

BROWNFIELD SOLUTIONS LTD

LONGSHAW STREET WARRINGTON JAN 2007 - PRESENT

Detailed site investigation of large former coach building factory for a large residential developer. Works included trial pitting and window sampling of the site which delineated a large area of hydrocarbon contamination, installation of ground gas monitoring wells, detailed chemical testing including groundwaters, Quantitative Risk Assessment and Ground Gas Risk Assessment.

A Remedial Strategy and Foundation design schedule was prepared. Liaison and subsequent agreement with regulators over remedial strategy. Earthworks are currently being undertaken.
